

Trivia Quiz Application

Sample Question 1 (Lesson 1: Introduction to Tkinter):

Question: Write a Python program that creates a simple GUI window using Tkinter. The GUI window should have a title "Trivia Quiz".

Sample Question 2 (Lesson 2: Displaying Questions on the GUI):

Question: Enhance the program from Sample Question 1 to include a label that displays the question "What is the capital of France?" on the GUI.

Sample Question 3 (Lesson 3: Adding Choice Buttons):

Question: Further enhance the program from Sample Question 2 to include four buttons labeled "Paris", "London", "Berlin", and "Rome" representing answer choices on the GUI.
